PROJECT OVERVIEW

Project 1

Role: Support Analyst / Team Lead

Technology: Java Spring Boot, Oracle, REST APIs

Others: XML, Excel, EDI

Project Overview:

The Insurance Claims Management System was designed to streamline the end-to-end claims processing workflow for a leading insurance provider. The

system enabled agents and customers to submit claims, track their status, and receive timely updates. It integrated with third-party services for fraud detection, policy validation, and payment processing.

Responsibilities:

- Participated in the initial transition and setup of the project from legacy systems to microservices architecture.
- Provided L2/L3 application support, resolving technical issues raised by business users and IT operations.
- Developed and maintained RESTful APIs for claims submission, validation, and tracking.
- Led a team of developers and analysts, managing weekly KPIs and conducting client governance calls.
- Created and maintained a Knowledge Database documenting frequent issues and resolutions.
- Implemented problem and change management processes to improve application stability and functionality.
- Coordinated with QA teams for regression testing and deployment planning.
- Ensured 24/7 application availability through structured monitoring and alerting frameworks.
- Conducted user training sessions and prepared technical documentation for internal and client use.
- Worked on security enhancements including role-based access control and data encryption.
- Supported integration with SAP for financial reporting and compliance tracking.

Thanking you,

Yours Faithfully,

For **Cognizant Technology Solutions India Private Ltd.,**

J S Srividya
Sr. Manager - HR
